About COIN WAY

COIN WAY is a decentralized cryptocurrency that aims to provide a secure, transparent, and trusted platform for digital asset exchange and management.

COIN WAY is based on the Ethereum blockchain and uses the TRC-20 standard for its token. The total supply of COIN WAY is 100 million tokens, and the initial distribution and its also 100% decentralized. Our journey start in 2018 as Real Estate Sales & Brokerage in the US. Since then our company has been growing slowly. Currently, our company is growing at a great rate with various projects. That's why we plan to create a crypto token. We are able to create a token in 2022 subject to all approvals from the US Government as per the plan. Which we named COIN WAY.

Table of contents

COIN WAY claims to offer several features and benefits to its users, such as:

- 01** Low fees and fast transactions.
- 02** High security and privacy.
- 03** User-friendly interface and easy access.
- 04** Staking and governance rights.
- 05** Reward system and referral program.
- 06** Users can earn through trading.
